

Mallikharjun Swamy Sudnagunta

Senior Infrastructure Engineer | Linux Systems Administrator | Offensive Security Specialist

Andhra Pradesh, India | masterguyarjun@gmail.com | [linkedin.com/in/masterguyarjun](https://www.linkedin.com/in/masterguyarjun) | github.com/masterguyarjun

PROFESSIONAL SUMMARY

Highly experienced **Linux Systems Administrator and Infrastructure Specialist** with over 20 years of hands-on technical expertise encompassing enterprise Linux systems, hypervisors, cloud infrastructure, and advanced automation frameworks. Combines deep system-level infrastructure knowledge with a highly active, 4-year track record in offensive cybersecurity research across elite platforms including **YesWeHack, Bugcrowd, and HackerOne** (specializing in API vulnerability scanning, CWE analysis, and secure workflow automation). Possesses a proven capability to manage full-lifecycle infrastructure deployment, technical support operations, and cross-functional IT coordination compliant with modern DevOps and DevSecOps paradigms.

CORE TECHNICAL SKILLS

Systems & Infrastructure: Linux Administration (Enterprise Distribution Tuning), Windows/macOS Enterprise Support, VPS & Dedicated Server Infrastructure, Bare-Metal & Cloud Configuration.

Offensive Security & Pentesting: Web & API Security Testing, Vulnerability Validation & Remediation, Network Reconnaissance Automation, OWASP Top 10 Engineering.

Virtualization & DevOps: VMware ESXi, VirtualBox, Distrobox/Containers, Infrastructure Automation, Shell & Python Scripting, Automated Workflow Orchestration.

Toolkits & Frameworks: Burp Suite Enterprise, Nuclei, FFuF, Katana, Subfinder, Xray Scanner, Git, Custom Recon Toolchains, WordPress Core Security Management.

PROFESSIONAL EXPERIENCE

Cybersecurity Researcher & Enterprise Penetration Tester — Bugcrowd (Freelance)

Jan 2023 – Present

- Execute gray-box penetration testing and advanced web application vulnerability assessments across diverse enterprise infrastructures.
- Identify, validate, and document critical architecture flaws, focusing on logical bypassing, SQL injections, XSS, and Cross-Site Request Forgery (CSRF).
- Leverage advanced penetration testing tooling (Burp Suite, FFuF, Nuclei) to analyze target surfaces and deliver clear, actionable remediation workflows.

Offensive Security Engineer & Code Auditor — YesWeHack (Freelance)

Jun 2022 – Present

- Perform rigorous API and web application security testing against European corporate scopes under structured strict Rules of Engagement (RoE).
- Architect customized Python and Shell automation scripts to automate continuous network reconnaissance, asset monitoring, and scanning.
- Map and isolate attack surface topologies to identify complex business logic vulnerabilities.

Vulnerability Analyst & Security Consultant — HackerOne (Remote)

Mar 2022 – Present

- Participate in high-scope private and public security programs, providing comprehensive threat modeling and vulnerability validation.
- Synthesize professional technical vulnerability advisories detailing reproduction steps, technical risks, and architectural fixes for development teams.

Infrastructure & Web Development Consultant — Self-Employed

Apr 2010 – Present

- Design, scale, and maintain client infrastructure frameworks leveraging secure WordPress builds, dedicated hosting, and virtual environments.
- Provide complete lifecycle IT management including backup schemas, endpoint firewall enforcement, server migrations, and performance optimization.

IT & Engineering Project Coordinator — PVR Projects Limited (Pune, India)

Mar 2004 – Oct 2006

- Coordinated large-scale project tracking matrices, verifying strict timelines, budget alignments, and cross-functional team milestones.
- Engineered internal project tracking protocols to unify operations and minimize system communication overhead.

Linux Systems & Help Desk Infrastructure Engineer — EPIC - NIC (Nellore, India)

Jun 2002 – Feb 2004

- Managed, deployed, and troubleshoot multi-user Linux, Windows, and macOS enterprise client topologies alongside high-availability hosting servers.
- Resolved high-tier hardware, network connectivity, and print server issues, guaranteeing optimal uptime matrices for production lines.
- Installed, configured, and hardened peripheral network architectures and core OS settings for incoming users.

ADDITIONAL OPERATIONAL & LOGISTICS ROLES

Swiggy Instamart — Fleet Logistics & Delivery Operations (2017 – 2019)

Nellore Marketing Private Limited — Warehouse Operations & Inventory Coordinator (2000 – 2002)

Hotline Computers — Information Management & Data Processing Clerk (1999 – 2000)

EDUCATION & CERTIFIED CONTINUOUS TRAINING

- **Professional Specialized Track:** Web/Multimedia Management & Advanced Webmaster Architectures — Udemy (2020)
- **Professional Specialized Track:** Digital Systems Communication & Cross-Media Engineering — Udemy (2019 – 2020)
- **Secondary School Education:** Krishna Memorial School (Graduated 1995)
